

Product Information:

The human sphere is a clear inflatable sphere made from 30 mil thick PVC. There are two sizes: the IF-HS-300065 model which is 6.5 ft in diameter, and the IF-HS-300080 model which is 8 ft in diameter. Both models come with a repair kit and 30 days warranty.

Both models are equipped with air/water tight zipper. The same zipper used on diving suit. The human sphere is a unique product that can be use for entertainment purposes such as concerts, water sports, half-time shows, parties, human bowling, etc.

Installation:

To inflate the human sphere, you can use an electric leaf blower or a similar blower (do not use a gas blower):

- Slightly zip down the zipper so the leaf blower's pipe can be place inside.
- Turn on the blower and inflate the product.

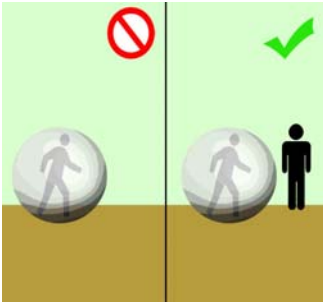

- Midway through the process, you can allow the player to enter the sphere while you continue.

- When sphere reach its rounded shape, quickly zip up the zipper.

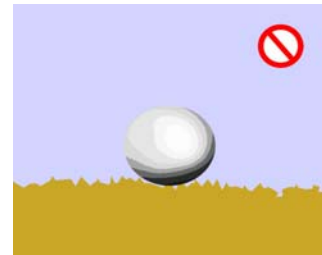

-
- Locate and unscrew the valve to add more air to the sphere until it is full. **Sphere is fully inflated when you are able to push the ball surface 5-6 inches inward. Do NOT over inflate.**
 - Never over inflate the product; **Any Damage from over-inflation is not covered by warranty.**

Operation:

- When using the human sphere, always have supervision present outside of the sphere. Never operate this product by yourself, or never leave players unsupervised.
- Never poke or cut the products with sharp objects. Never set the products close to fire flames.
- The maximum time for player staying inside the sphere should NOT exceed 10 minutes at a time.
- When a player exit the sphere, make sure to open up the zipper to refresh the air inside the sphere. When open the zipper, make sure you open the cover carefully without pulling off the Velcro and pull the zipper gently in straight direction.
- Do not operate the sphere on a jagged/rough surface, this may damage the sphere.
- When operating on water, please use rope to tie down the sphere to prevent being drifted away from water waves.

Emergency:

- If a person is trapped inside the sphere and cannot exit the sphere, use a sharp knife to cut open the product to let the player out.

Storage:

- Reverse the steps in Installation to fold and package the products.
- Do NOT bend the zipper, otherwise it zipper will be damaged.
- This product is made of waterproof fabric. Wipe clean the surface of the product after every use, especially after use in rain. Make sure the products are in totally dry both inside and outside before packing;
- To prolong the product life and maintain its original color, store the package in room temperature with good ventilation and avoid direct sunshine.

Zipper Maintenance:

- **Air tight zipper is a very delicate product and requires careful maintenance. The zipper MUST be waxed and/or lubricated after each use. If you feel hard to pull the zipper, apply wax and/or lubricant to smooth operation. Any damage from improper operation of zipper is NOT covered by warranty.**
- Before opening and closing the zipper, clean with water, or brush away any debris that may be attached inside and outside the elements. Failure to do so may damage the zipper and deteriorate the air and water tightness.
- Be sure to pull the slider straight along the zipper when opening and closing it. Slowly pull down the slider by the tab when closing. Do not pull from an angle because if you do, the elements will not engage properly and may damage the zipper and deteriorate the air and water tightness.
- If the underclothing or other objects become stuck and jam the zipper, pull the slider back, identify the jamming object, clear it and slowly close again.
- When in use, close the slider tightly at the end in order to maintain the air and water tightness of the zipper.
- Do not use in places where the water temperature is below 10°C (50°F). The air and water tightness will deteriorate and cause the PVC to harden.
- PVC tape gradually loses air tightness over time because of its PVC properties.

Optional Items (not included):

- The electric blower;
- Rope for tie down;
- Pro repair kit;
- Zipper lubricant;

Warranty:

- The human sphere comes with a 30 days limited warranty on all products, parts and labors; The human sphere is covered against quality and material defect as well as craftsmanship under normal intended use. Any damage occurred during the use is NOT covered under the warranty.
- The warranty doesn't cover any wear and damage caused by improper use and operation, including but not limited to rough handling, abuse, tampering, improper power supplies, unauthorized repair and maintained.
- For this product, the air tight zipper has limited life span. Per manufacturer, it is expected of 100-800 times of use depending on your applications and maintenance;
- Warranty covers only one way freight to mainland USA. It is your responsibility to send the product back to us for repair or replacement;
- Warranty service - always call or email us to report problem and get the instruction on how to get warranty service.
